Command BRAND STRIPS

A Clearly Decorative Project:

Window Decorations

Add some of your personality to your windows!

Materials needed:

- 8 sheets of tag board (2 of each color)
- 1 roll cellophane wrap
- 1 package Mylar wrapping paper
- 1 can 3M Super 77 Spray Adhesive
- 1 roll colored string (coordinated to tag board colors)
- 1 can high gloss spray paint (optional)
- 1 pair Scotch™ Precision Ultra Edge Non-stick Scissors
- Pencil and circular objects for tracing
- Ruler
- Scotch® Magic™ Tape
- 6 Command™ Clear Small Hook

Steps:

1

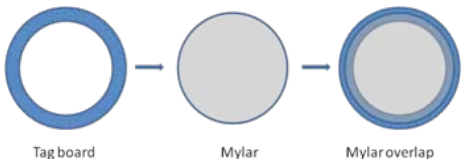
Trace 3” circles onto each sheet of tag board. Trace a slightly smaller diameter circle inside of each to create a donut outline.

2

Cut out each circle of tag board and the inner circles. You will have 18 disks of each color and 18 donuts in each color.

3

Using the tag board disk as your guide, trace and cut 18 disks of cellophane wrap and 18 disks of Mylar paper. Be sure to allow an extra ¼” diameter in these disks so they will overlap the inner space of your tag board donuts.



4

Cut 30, 9” lengths of string.

A Clearly Decorative Project:

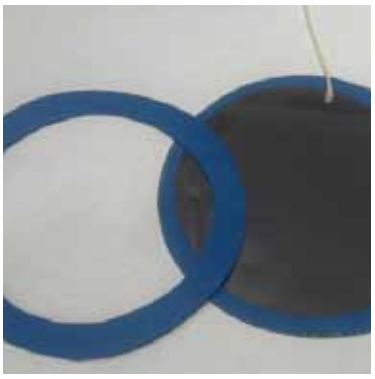
Steps (continued):

5

In a well-ventilated, masked off area, spray one side of a tag board donut. Move the donut to a clean sheet of paper and center the Mylar disk over the donut. Place and press to secure the bond.

6

Place the tip of a length of string onto the edge of the adhesive-sprayed donut.



7

Center a second tag board donut on top of the prepared string/Mylar/tag board unit and press to secure the bond.

8

Repeat step 7, linking each tag board unit to another using the lengths of string. Assemble 5 tag board units per strand. You should end with 6 strands, with some extra left over. Be sure to alternate Mylar and cellophane wrap and alternate tag board colors to create a pleasing pattern.

9

Use Scotch® Magic™ Tape to attach the tag board disks to the center of each length of string between every two units.

10

Use Scotch® Magic™ Tape to attach the final 6 pieces of string in loops to the top tag board unit on each strand.

11

Affix 6 Command™ Clear Small Hooks (following all package instructions) to tops of window frames. Hang each strand on the hooks. Enjoy!
